

300

FEATURES:

- **Linear Directivity cross-over network for improved off-axis frequency response**
- **Absorbent material on front baffle for reduced diffraction**
- **1" tweeter with phase-compensation grill, damped cloth diaphragm and anti-compression chamber**
- **Crossover with metal alloy polypropylene capacitors and air-core inductors**
- **Bass reflex for enhanced deep bass output**
- **Enclosure of 22mm particleboard with extensive internal bracing**
- **Linear impedance for easy amplifier load**
- **6 1/2" mid/bass driver with mineral-loaded polypropylene diaphragm, special rubber suspension, 32mm voice coil and powerful magnetic system**
- **Dual, gold-plated terminals for bi-wiring/bi-amping**
- **Mirror-image pairs in real wood veneer**
