EUPHONIA AS2

The Euphonia AS2 (AS for Active Subwoofer) high-power subwoofer is an entirely new approach to subwoofers. The dual driver subwoofer has been designed to act as a base for the CS4 center speaker.

The AS2 includes a heavy, absolute zero mechanically grounded polymer granite base with integrated adjustable spikes. A 12" long-throw woofer is placed in each end panel, connected electrically to work in opposite directions, canceling vibrations and resonances in the subwoofer cabinet, leaving a totally inert, motionless system.

In order to obtain the ultimate in speed, pitch definition and accuracy, the AS 2 is a dual chamber, sealed system with mild equalization in the DALI Class D amplifier to be able to reach really deep. The amplifier is a 650 Watt (1300 Watt peak) high-efficiency design. A stylish and very powerful subwoofer that matches the other Euphonia speakers perfectly in sound and appearance.

The Euphonia Series is developed, designed, hand-built, assembled and individually tested at the DALI factory in Denmark.

SPECIFICATIONS

Frequency range (+/- 3dB) [Hz]:	25,0 - 200,0
Maximum SPL [dB]:	120,0
Crossover frequencies:	40 - 100
Enclosure type:	Closed box
Connection input(s):	Mono "line level" (LFE);S
Connection output(s):	Stereo "line level" (high
Functions:	Crossover frequency;Varia
Recommended placement:	Sub;Floor
Loudspeaker type:	Subwoofer
Max loudspeaker dimensions incl. base and grille	405 X 675 X 615
Loudspeaker weight including base and grille [kg]:	64,0
